Upeksha Chiranthi Gulegodage

Date of birth: 13/11/1992 | **Nationality:** Sri Lankan | **Phone:** (+358) 413194140 (Mobile) | **Email address:** upekshachiranthi@gmail.com | **LinkedIn:** https://www.linkedin.com/in/upeksha-godage/ | **Address:** Yliopistokatu 38 A 103, 90570, Oulu, Finland (Home)

ABOUT MYSELF

Motivated engineering student experienced in full-stack and mobile development, with a strong focus on building practical, user-centered applications. Proficient in modern web and mobile technologies, with solid problem-solving skills and an understanding of software development best practices. Eager to apply technical skills in real-world environments and contribute to impactful projects.

WORK EXPERIENCE

05/05/2025 - 01/08/2025 - OULU, FINLAND

SUMMER TRAINEE OULU UNIVERSITY OF APPLIED SCIENCES

Developed an AI-powered full-stack learning platform for managing assignments, exams, and personalized feedback, featuring AI-generated student feedback, timed exams with focus tracking, and a teacher dashboard for exam configuration and student management. Includes manual and AI-assisted question creation with editing and deletion, secure data storage, and exportable feedback reports. Built with React + Vite, Node.js, Express, and integrated AI services from OpenAI, Cohere, DeepSeek, with secure backend storage using Supabase.

EDUCATION & TRAINING

23/08/2023 - Current - OULU, FINLAND

BACHELOR OF ENGINEERING - OULU UNIVERSITY OF APPLIED SCIENCES

Level in EQF: 6 | **Website:** https://oamk.fi/

10/02/2014 - 10/08/2016 - COLOMBO, SRI LANKA

HIGHER NATIONAL DIPLOMA IN QUANTITY SURVEYING- SRI LANKA INSTITUTE OF ADVANCED TECHNOLOGICAL EDUCATION (SLIATE)

Level in EQF: 5 | **Website:** https://hnde.lk/

SKILLS

AI assisted development
GitHub Copilot | ChatGPT | Cohere AI API | OpenAI API

Programming languages and libraries
Kotlin | Python (basics) | Vitest | Jest/testing-library | JavaScript | TypeScript | C programming | C++ | React.js, Node.js, Bootstrap, HTML, CSS

Tools and technologies
Rest API | Microsoft Office | Agile development | Version Control (Git)

LANGUAGE SKILLS

Mother tongue(s): **SINHALA**

Other language(s): **ENGLISH** | **FINNISH**

PROJECTS

01/03/2025 - 03/05/2025

New Budget Tracker - Mobile Application Developed an Android mobile application for managing monthly budgets, enabling users to track income and expenses, create budget plans, and visualize spending through charts. Implemented social login, real-time data synchronization, and overspending alerts using Firebase services. Built with Kotlin and Jetpack Compose following the MVVM architecture for a modern and responsive user experience.

01/02/2026 - 20/02/2026

Job Application Tracker Developed a full-stack web application to help job seekers track applications, manage statuses, and gain insights into their job search process. Implemented a unified dashboard for application management, search and profile tools, and AI-powered analysis of recent applications using Cohere. Built secure user authentication and data storage with Supabase, featuring a clean and responsive user interface. Developed using React, Vite, Bootstrap, Node.js, and Express.

27/10/2024 - 14/12/2024

CINESCOPE – Movie Web Application Developed a full-stack movie web application for browsing films, viewing real-time showtimes, and sharing reviews. Implemented movie search and filtering using data from The Movie Database (TMDB) and integrated live theater schedules from Finnkino. Built features including user authentication, group creation, favorite movie sharing, and review management with a fully responsive UI. Developed using React, Node.js, Express, and PostgreSQL.
